## **RATES GUIDE**

Initially, you as a client would give me an estimate of how many images are required for your advertising purposes. We would also discuss any special requirements, staged or setup scenes etc. which would be charged at an additional rate to those outlined below.

Based on this estimate, I will shoot, edit and then present final images for you to choose from. Some assignments might require me to return for a second or third shoot – perhaps to allow for a variety of light conditions or because of time constraints; setting up etc.

As there are so many variables : shoot time required vs number of images taken vs number of shoots needed etc, each clients individual needs will be discussed before a final quote is presented.

The final cost for straight forward shoot/s, would though, be based on the number of digital images required by you, the client, and the table below provides a cost guideline:

No. images	1 shoot	2 shoots	3 shoots
1	1000		
2	1350	1850	-
3	1700	2200	2700
4	2050	2550	3050
